Why Dreamwalls?

At Dreamwalls, we strive to deliver innovative glass products that architects, designers, contractors, glaziers, and installers can build their business and reputation on. Our goal is to help you succeed with glass.

Experience
We've been manufacturing glass and mirrors since 1962, with over 1 billion sq ft delivered.

Design Customization
Unleash your creativity by customizing and combining a variety of Dreamwalls products.

Broad Capabilities
We offer a broad range of in-house fabrication, helping control quality and lead times.

Quality
We stand behind our products and meticulously manufacture to spec and industry standards.

Made in the USA
Support local business and jobs. Our manufacturing is proudly done in NC and TX.

Low Lead Times
Get orders delivered on time to keep projects on schedule with industry-leading lead times.

Committed Service
Our team works diligently to keep projects on schedule and quickly solve any challenges.

Values Driven
Good values create happier employees and produce great results for customers.

Competitive Pricing
Our experience, efficiency, and in-house capabilities often result in significant savings for our customers.

"The entire team, leadership, sales, customer support, manufacturing, and delivery has consistently been exceptional."

Joey Karas, Karas & Karas Glass, Boston *(customer for over 30 years)*

Sandblasted Mirrors

Designed to please, these mirrors not only look magnificent, but they also help light their subjects like no other mirror can.

MADE IN THE USA

PRODUCT INFO

Glass: Made from low-iron or mirror-quality clear glass.

Sandblasted Area: Custom (2-sides, 4-sides, various widths)

Edges: Clean Cut, Seamed, Flat Polished, or Pencil Polished

Fabrication Options: Holes, Cutouts, Notches

Max Size: 60" x 120"

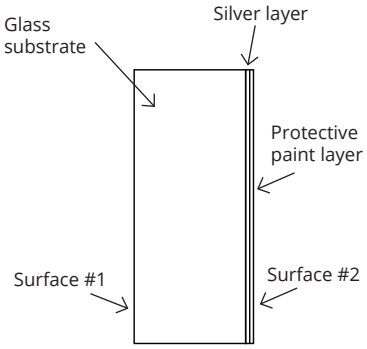

Thickness: 3mm (1/8") to 6mm (1/4") for low iron mirror, or 2.5mm (3/32") to 10mm (3/8") for standard/clear glass

Note: To create this cool effect, a portion of the mirror is taped off and sandblasted, creating a matte glass look in a portion of the mirror that can be lit from behind with LED lights.

Antique Mirrors

Classy antique mirrors with beautifully consistent patterns.

MADE IN THE USA

***Above**: Clear Charcoal Antique Mirrors*

***Below**: Bronze Charcoal Antique Mirrors*

PRODUCT INFO

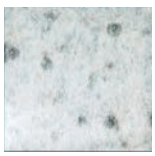

Color & Pattern Options

Clear Charcoal

Bronze Charcoal

Clear Storm

Bronze Storm

Edges: Clean Cut, Seamed, Flat Polished, or Pencil Polished

Fabrication Options: Holes, Cutouts, Notches

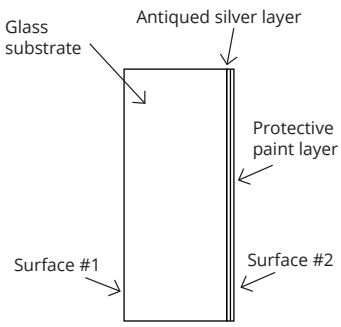

Safety Options: Tempering, Laminating

Max Size: 84" x 130"

Thickness: 3mm (1/8") or 6mm (1/4")

Compliance: ASTM C1036 (annealed) or ASTM C1048 (tempered)

Note: Since antique mirrors are produced by modifying the normal silvering process, the pattern will vary slightly from sheet to sheet. The art of making antique mirrors is so subjective that it is sold as an as-is product.

Disclaimer: Tempered glass is used in manufacturing mirrors where safety is the paramount concern. Due to anomalies that are inherent in the tempering process, tempered mirror can not be held to the same quality standards of annealed mirror.

Surface blemishes that should be anticipated include scratches and rubs. Because the glass must be tempered prior to silvering, these blemishes can be encountered on both the face and silvered surfaces.

Silver overspray on the edges of tempered, polished edge mirrors is something that is unavoidable. This is the result of the process to produce this product. The glass must be edged prior to tempering. Silvering is the last step in the production process. Overspray on the edges is typical for this product.

Also inherent in tempered glass is an increased level of distortion. This distortion is due to the energy trapped in the glass by the tempering process. This creates a certain amount of bow or warp. The visual effect is further amplified by the application of the silver reflective coating in the mirroring process.

Alternative options include annealed mirror with safety backing or annealed mirror laminated to tempered clear or low-iron glass.
