

Tempered Glass Care & Cleaning Instructions

Tempered glass is a durable and versatile material used in a variety of applications, including office partitions, shower enclosures, and more. To maintain its clarity and appearance, follow these guidelines for proper care and cleaning:

1. **Avoid Scratching:** Although tempered glass is strong, it can be easily scratched. Avoid using abrasive materials, scouring pads, or any sharp objects on the surface.
2. **Use Soft Cleaning Tools:**
 - a. **Cloth:** Use a soft, lint-free microfiber cloth for cleaning. This helps prevent scratches and ensures a streak-free finish.
 - b. **Sponges:** If a sponge is necessary, opt for a non-abrasive one.
3. **Choose the Right Cleaning Solution:**
 - a. **Mild Soapy Water:** Mix a small amount of mild dish soap with warm water. This solution is effective for removing fingerprints, smudges, and general dirt.
 - b. **Glass Cleaner:** Use a commercial glass cleaner specifically designed for use on tempered glass. Avoid cleaners with harsh chemicals like ammonia, which can damage the surface over time.
4. **Cleaning Process:**
 - a. **Preparation:** Remove loose dirt and dust by gently wiping the surface with a dry microfiber cloth.
 - b. **Application:** Apply the cleaning solution to the cloth or sponge, not directly to the glass. This prevents the solution from seeping into the edges and causing potential damage.
 - c. **Wiping:** Gently wipe the glass in a circular motion. For tougher spots, apply light pressure but be careful not to scrub too hard.
 - d. **Drying:** Use a dry, clean microfiber cloth to remove any remaining moisture and polish the glass.
5. **Regular Maintenance:** Clean the glass regularly to prevent the buildup of dirt and grime, which can become harder to remove over time.
6. **Handling Caution:** When moving or installing tempered glass, handle it carefully to avoid chips or cracks. Always support the entire piece and avoid putting pressure on the edges.

Note: While tempered glass is highly durable, it can still be scratched easily. Always use appropriate cleaning materials and methods to maintain its pristine condition.
