Why Dreamwalls?

At Dreamwalls, we strive to deliver innovative glass products that architects, designers, contractors, glaziers, and installers can build their business and reputation on. Our goal is to help you succeed with glass.

Experience

We've been manufacturing glass and mirrors since 1962, with over 1 billion sq ft delivered.

Quality

We stand behind our products and meticulously manufacture to spec and industry standards.

Committed Service

Our team works diligently to keep projects on schedule and quickly solve any challenges.

Design Customization

Unleash your creativity by customizing and combining a variety of Dreamwalls products.

Made in the USA

Support local business and jobs. Our manufacturing is proudly done in NC and TX.

Values Driven

Good values create happier employees and produce great results for customers.

Broad Capabilities

We offer a broad range of in-house fabrication, helping control quality and lead times.

Low Lead Times

Get orders delivered on time to keep projects on schedule with industry-leading lead times.

Competitive Pricing

Our experience, efficiency, and in-house capabilities often result in significant savings for our customers.

“The entire team, leadership, sales, customer support, manufacturing, and delivery has consistently been exceptional.”

Joey Karas, Karas & Karas Glass, Boston *(customer for over 30 years)*

Sandblasted Mirrors

Designed to please, these mirrors not only look magnificent, but they also help light their subjects like no other mirror can.

PRODUCT INFO

Glass: Made from low-iron or mirror-quality clear glass.

Sandblasted Area: Custom (2-sides, 4-sides, various widths)

Edges: Clean Cut, Seamed, Flat Polished, or Pencil Polished

Fabrication Options: Holes, Cutouts, Notches

Max Size: 60" x 120"

Thickness: 3mm (1/8") to 6mm (1/4") for low iron mirror, or 2.5mm (3/32") to 10mm (3/8") for standard/clear glass

Note: To create this cool effect, a portion of the mirror is taped off and sandblasted, creating a matte glass look in a portion of the mirror that can be lit from behind with LED lights.

Warranty: 5 Years

Specify on:

Compliance: ASTM C1172, ANZI Z97.1

Note: We do not laminate tempered mirror, however, we can laminate annealed mirrors to tempered clear or low-iron glass.

Warranty: 5 Years

Specify on:

Tempered Mirrors

Beautiful safety mirrors done right - fabrication, tempering, and silvering all done in-house.

Up to 94 x 130"

PRODUCT INFO

Glass: Made from low-iron or mirror-quality clear glass.

Edges: Clean Cut, Seamed, Flat Polished

Fabrication Options: Holes, Cutouts

Min Size: 24" x 24"

Max Size: 94" x 130"

Thickness: 5mm (3/16"), 6mm (1/4")

Compliance: ASTM C1048, ANZI Z97.1, 16 CFR 1201 II (Federal Safety Standard)

Disclaimer: Tempered glass is used in manufacturing mirrors where safety is the paramount concern. Due to anomalies that are inherent in the tempering process, tempered mirror can not be held to the same quality standards of annealed mirror.

Surface blemishes that should be anticipated include scratches and rubs. Because the glass must be tempered prior to silvering, these blemishes can be encountered on both the face and silvered surfaces.

Silver overspray on the edges of tempered, polished edge mirrors is something that is unavoidable. This is the result of the process to produce this product. The glass must be edged prior to tempering. Silvering is the last step in the production process. Overspray on the edges is typical for this product.

Also inherent in tempered glass is an increased level of distortion. This distortion is due to the energy trapped in the glass by the tempering process. This creates a certain amount of bow or warp. The visual effect is further amplified by the application of the silver reflective coating in the mirroring process.

Alternative options include annealed mirror with safety backing or annealed mirror laminated to tempered clear or low-iron glass.

Warranty: 5 Years
